Mexico City, Mexico

PROFESSIONAL SUMMARY

Mechatronics Engineer and Unity Game Developer with professional experience programming gameplay systems, player interactions, user interfaces, physics-based mechanics, and interactive applications in C#. Experienced in game jams and team projects, from prototyping and system development to playtesting and delivery.

Built educational games and immersive experiences using reusable C# components, progression systems, enemy behaviors, scene transitions, shaders, and audiovisual feedback. Experienced collaborating with artists and designers, troubleshooting gameplay, and coordinating cross-functional production.

Seeking Game Developer and Gameplay Programmer opportunities focused on responsive systems, player experience, and polished playable builds.

EDUCATION

Generation México | *Mexico City, Mexico* May 2026 - Aug 2026
Unity Developer Program

National Autonomous University of Mexico — UNAM | *Mexico City, Mexico* 2018 - 2023
Bachelor's Degree in Mechatronics Engineering

PROFESSIONAL EXPERIENCE

Banco Actinver | *Mexico City, Mexico* Jul 2024 - Mar 2026
Spatial Computing Engineer / Game Programmer

- Developed immersive financial-learning experiences in Unity and C#, turning concepts into playable mechanics.
- Programmed gameplay systems, quizzes, UI, timers, player progression, and physics-based interactions.
- Created reusable components, integrated feedback systems, and collaborated across disciplines.

Infomedia | *Mexico City, Mexico* Feb 2024 - Jul 2024
Data Analyst / Data Consultant

- Created, modified, and queried databases using SQL.
- Developed reports and queries for business areas and audit processes.
- Used Hadoop, Hive, Impala, Databricks, AWS, Google Cloud, Git, and Jenkins.

Brita Inteligencia Artificial | *Mexico City, Mexico* Aug 2023 - Jan 2024
XR Technical Designer

- Built an AI-powered digital human application in Unity with an interactive avatar.
- Integrated voice input, API/server communication, audiovisual responses, and feedback flows.
- Debugged issues involving Unity, WebGL, audio, and network communication.

TECHNICAL SKILLS

Unity | C# | Gameplay Programming | OOP | Game Mechanics | Character Systems | Physics
UI Programming | Scene Management | Shaders | VFX | Game Design | Debugging | Git/GitHub
Project Management | GDD | VR/AR | Unreal Engine | Blender | SQL | Testing

PROJECTS

Zero Signal Games | *Mexico City / Remote* Aug 2026
Project Manager / Unity Developer

Dunk & Dash (Link)

- Coordinated development from planning to demo delivery, assigning tasks and tracking milestones.
- Created and organized the Game Design Document (GDD) and project documentation.
- Programmed scene transitions and physics-driven curtain effects using Unity and C#.

Banco Actinver | *Mexico City, Mexico* Jul 2025 - Mar 2026
Game Programmer / VR Developer

Inflation Paradox (Link)

- Developed interactive VR gameplay to teach financial concepts through playable challenges.
- Programmed quizzes, enemy behaviors, progression, timers, health, and player feedback.
- Integrated colliders, triggers, particles, animations, audio, and UI systems.

Game Work Jam | *Mexico City, Mexico* Jun 2025 - Aug 2025
Unity Gameplay Programmer

Pitz: The Game of the Gods (Link)

- Developed dialogue systems supporting narrative flow and character interactions.
- Implemented shaders for collectible and interactable items to improve visual feedback.
- Integrated visual elements and collaborated with a multidisciplinary team.

Personal Project | *Mexico City, Mexico* Oct 2022 - Dec 2022
Unity Generalist Developer

Apolodoro's Library

- Developed a PC adventure inspired by Theseus and the Minotaur.
- Programmed exploration, combat, enemies, missions, progression, and a boss battle.
- Implemented switching between first-person and third-person perspectives.

Game Jam | *Collaborative Project* Game Jam
Gameplay Programmer / Game Designer

Cookie Panic (Link)

- Designed core gameplay rules, mechanics, and the development workflow.
- Programmed player interactions, item spawning, repairs, timers, and UI using C#.
- Integrated 3D assets into the complete playable experience.
